AviBrom®

AviBrom® is a broad-spectrum antimicrobial that effectively reduces Salmonella, Campylobacter and E.coli on poultry carcasses and parts. It is approved for multiple intervention hurdles in poultry processing.

- Safe and effective alternative to Peroxyacetic acid
- No odor or exposure concerns in the atmosphere
- Granular product that does not expose workers to hazardous chemical reactions
- Non-corrosive to soft metals and steel and will not damage concrete floors
- Approved for use in dips, chillers, inside-outside bird washers, scalders and plant process water at up to 450 parts per million. (FCN# 1190)

Equipment

- Simple and safe loading and handling
- Dry product added to feeder systems for dissolution
- Manual or PLC-controlled dosing options
- Automated component provides digital ppm output

AviBrom® Features and Benefits

- | | |
|---|---|
| • Equal to, or better efficacy than PAA in parts dips | • Safe for use around employees and USDA inspectors |
| • Less corrosive than PAA | • Non-offensive low odor |
| • Equally effective in cold or warm water | • No impact on wastewater systems |
