## Poultry Slaughter and Processing

Crimson Chemicals offers a complete line of poultry slaughter and processing solutions:

- Antimicrobial interventions
  - Automated dosing equipment and support
  - Processing aids

## Food Safety Intervention Solutions

### AviBrom®

- FCN Number 1190
- Use at up to 450 ppm in chillers, IOBW, scalders and process water
- Granular nugget that is easily dissolved and fed to intervention hurdles throughout the plant
- Less Corrosive than PAA and ASC
- Low odor

### Peroxyacetic Acid (PAA)

- FCN Number 1638
- Approved use at up to 2000 ppm on whole or cut poultry, parts, trim, and organs
- Use is chillers, dips, spray, OLR and OFLR
- 6, 15 and 22% PAA formulations

### Acidified Sodium Chlorite (ASC)

- 21 CFR 173.325
- Approved use at up to 1200 ppm on whole or cut poultry, parts, trim, organs and processed products, including Ready-to-Eat
- Use in chillers, dips sprays and deluge intervention hurdles

### CL 21/80

- FSIS Directive 7120.1
- Lactic/citric acid blend that is effective reducing shiga-toxin producing E.Coli, and Salmonella

### CAPE (Crimson Automated Pathogen Eliminator)

- Real-time dosing and monitoring of PAA and caustic
- Programmable alarms and datalogging reports
- Lockable cabinets
- Free standing or wall mounted

## Sanitation Solutions

### Sanitation Chemicals

- High foaming alkaline cleaners
- Low foaming CIP cleaners
- Quaternary Ammonium Chloride
- Chlorine (Sodium Hypochlorite 12.5%)
- Peroxyacetic Acid
- Hand soap and hand sanitizers

### Sanitation Equipment

- Portable tank foamers
- Wall foamers
- Chemical mixing stations
- Entryway sanitizing systems
- Titration Kits and Strips
- Hand soap and sanitizer dispensers
